# HOW TO USE NATIONAL JOURNAL INDEXES

Material in *National Journal* is indexed six ways:

## NATIONAL JOURNAL REPORTS CHECKLIST .....4

This checklist is designed to provide quick access to major reports which have appeared in *National Journal* in 1970.

### personal names .....8

including public officials and private individuals whose activities are referred to in *National Journal*. Excluded from this index are deceased persons, historical figures and authors of articles cited in "media" listings.

### private organizations .....51

including associations, law firms, lobby groups, trade organizations, corporations and universities whose activities are covered by *National Journal*. Divisions of private organizations are listed under the organization. Independent subsidiaries are listed independently. All organizations are listed under their complete, official names. If the official name begins with initials or a first name rather than the surname, the organization is filed alphabetically under the initial or first name as follows:

E. C. Knight Co. files with the E's  
Arthur D. Little Co. files with the A's

### government organizations .....65

including congressional committees (section one), federal departments and independent agencies, state government units and international organizations (section two). Government organizations are filed under their substantive names; for example:

Office of Education is filed as Education Office  
Bureau of Labor Statistics is filed as Labor Statistics Bureau  
Commission on Campus Unrest is filed as Campus Unrest Commission  
Advisory Commission on Intergovernmental Relations is filed as Intergovernmental Relations Advisory Commission  
House Committee on Public Works is filed as Public Works Committee, House

Subdivisions of government units are listed under the main entry. Proposed government units are in *italic type*.

### geographic areas .....88

including states, cities, congressional districts, foreign countries and other geographic place names. Sections of the Geographic Index are United States, U.S. Trusts and Territories and Foreign Countries.

### subjects .....101

This structured index is arranged in broad subject categories which appear in **bold face type**. Each main category has subordinate categories: for example, under **communications** are subordinate categories magazines, newspapers, telephone; under **transportation** are aviation, highways, railroads. Many cross references are included in the subject index to refer the user to the appropriate main category. Example: *aviation see transportation; television see communications*.

When persons, places or organizations are mentioned in the *National Journal* several times, *subject headings* are used under the name.

*Major studies or analyses* are indicated in **bold face type**.

Entries are *alphabetized* letter by letter. Example:

American Road Builders  
Americans for Democratic Action  
American Society of Newspaper Editors

Aetna Life and Casualty Co.  
AFL-CIO  
Air Transport Assn.

If material cannot be located through use of these indexes, subscribers may call *National Journal's* Information Systems Division for assistance, 202-833-8000, Ext. 383.

This index supersedes the July-October 1970 *National Journal* cumulative index. This cumulation should be retained for permanent reference.
